For pets with love

We are professional producer of high-quality supplementary pet food for dogs, cats, rodents and other small animals in Czech republic. Our company was established in 1992 so we have been in this business for more than 29 years. We consider ourselves professionals. Having said that we can provide you with complex services. Our main goal is to provide feed supplements for pets which do not only taste but also help. We produce snacks which contain fat, milk by-products etc. like „chocolate“ products, bakery (hard bakery and semi-moisted bakery products), filled parcel, dental snacks and extruded soft snacks in various of shapes and flavours under our labels (Mlsoun, Dafiko, Dentafit etc.) and under private labels of our customers.

Natural COLLAGEN

benefits

Collagen is the main structural protein found in the body (up to 35%). It's necessary for the regeneration of the whole organism and for young animals at the time of growth. Found in blood vessels, bones, muscles, skin, tendons, and digestive system. Collagen plays a vital role in replacing dead cells to maintain skin strength and elasticity. It also helps in the development of cartilage tissues, tendons and keeps the joint health intact. Briefly speaking, it is the 'glue' that binds the body organs together.

Maintains Joint Health And Overall Bone Health

Joints, cartilage, and connective tissue health is maintained by the protein and also prevents the problems that along with aging like joint pain, Osteoporosis and mobility issues.

Promotes a healthy skin and a shiny coat

Collagen is responsible for maintaining skin elasticity and skin health. The layer of skin called dermis is mainly made of collagen. Also, a good supply of collagen will eventually improve the skin and fur health.

Improves Digestion and Digestive System

It helps the digestive system and also helps in syndromes like leaky gut in dogs.

Improves Appetite

As dog's age, their appetite decrease. And it is a big concern for pet owners because if your pooch doesn't eat you won't be able to feed the nutrients and supplements that it requires. In this situation, collagen helps and increases the appetite of dogs.
